Dan:

Subject: Contract PR-8200

Attached is our definitive proposal for the work contemplated on the above contract. This proposal is based on the 18" f/3.8 system which is described in Document No. 119, attached. This proposal is based on the contract extending through June 1962 so that it will be completed with final acceptance of the last of the six (6) systems.

Our proposal consists of the following documents:

- A. Statement of Work, Attachment I
- B. Cost Data, Attachment II (Exhibits "A" through "F")
- C. Terms and Conditions, Attachment III
- D. Contractor's Document No. 119, Attachment IV

The estimated costs presented in this proposal are based on the following:

1. This proposal covers only the services, materials, etc., to carry the program through the time that all units have been accepted. It does not include any "operational" field service, M & O, or spare parts. A budget estimate for these items will be submitted separately in the near future.

2. A single quartz window glazing has been included. If it proves necessary to provide a more complex window, we propose that this be considered a change in scope.

You will note that the Statement of Work under paragraph 1.2 indicates that we have completed Item 1 and are submitting our recommendation in Document No. 119, which is Attachment IV. We are proceeding with the final design of the system under Item 2 of the Statement of Work and would, therefore, appreciate your approval of Item 1 as indicated in the Statement of Work.

STATINTL In regard to the no-charge usage of facilities requested under paragraph II.A. of Attachment III, it will be necessary that New York Air Procurement District be furnished with a letter which states that this contract [REDACTED] was negotiated on the basis of such no-charge usage.

For your information we have attached a draft of such a letter. When we receive a copy of this letter, we can then take appropriate administrative action with the Administrative Contracting Officer on [REDACTED]
